# **ALTUGLAS® CN COLOUR**

The Altuglas® CN Colour are diffusing or opaque product. Hundreds of colours and light transmissions are available. It can be easily thermoformed, bended, cut, drilled and glued. There's no limit to your imagination.

#### **MAIN PROPERTIES**

PMMA (Polymethylmethacrylate)	$CH_3$ $CC - CH_2 \rightarrow n$ $CC - CH_3 \rightarrow n$ $CC - CH_3 \rightarrow n$			
Light				
Diffusing or Opaque				
UV resistant - No change of colour				
Thermoformable				
Easy machining				

### MAIN APPLICATIONS

- Furniture
- Cosmetic
- Shop fitting
- Signage

#### **PACKAGING**

- Our standard film offers a strong adhesion thanks to an additional adhesive layer. On demand a dedicated thermoformable film can be proposed.
- Our product is stored on wood pallets with a PP sheet at the bottom and a cardboard at the top.
- The total weight of the pallet + sheets is less than one ton.

## **STORAGE**

The following rules has to be applied:

- Store the product in a dry place, indoors.
- Place a polyethylene cover over the stack when a sheet is removed, to reduce moisture absorption.
- Only use original delivery pallets.
- Stack pallets of the same size and design to prevent waving.
- Place pallets on even surfaces (floor or shelf).
- The durability of the protective film is limited (sensitive to UV, temperature, humidity and chemicals).

#### **CERTIFICATES**

- Our sheets rely to the norm ISO 7823-1: 2003 regarding types, dimensions and characteristics.
- Our management system fulfils the requirements of the ISO 9001: 2008
