ALTUGLAS® SIGNATURE

Always including Luxury

A creator's dream, spun from acrylic glass, to add a touch of Luxury to all your living spaces. Altuglas Signature® brings style to your ideas, where others offer only materials. It is twice as light as glass and as clear as crystal, but more robust. A collection in seven textures - in grids, meshes and lacework - with the freedom to produce your designs using your own fabrics.

Works with natural lighting or LEDs along the edges, to change any room's colours and atmosphere at will.

ALTUGLAS® SIGNATURE :

a range of acrylic glass sheets that you can customize or use as is. Choose from our precious fabrics with their fine weaves, lace or moiré, or our play with the disconcerting volume effects provided by non-woven fabrics. Alternatively, bring in your own textiles and we'll take care of the rest.

ALTUGLAS® SIGNATURE

has all the traditional properties of a superior quality acrylic glass, plus the high degree of technicality involved in the incorporation of textiles. Our sheets are twice as light as and more transparent than glass. They display no distortion effects yet still offer an outstanding quality of light transmission.

Altuglas® Signature stands up brilliantly to the compulsory materials testing for the fields of architecture and design, such as sandbag tests and shock and heat resistance tests.

ALTUGLAS® SIGNATURE

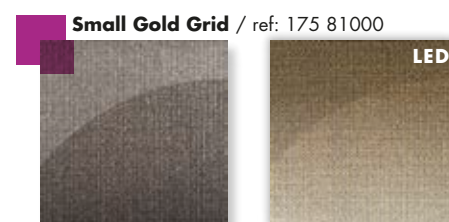

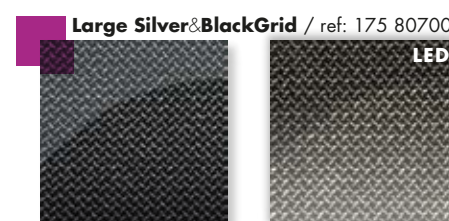

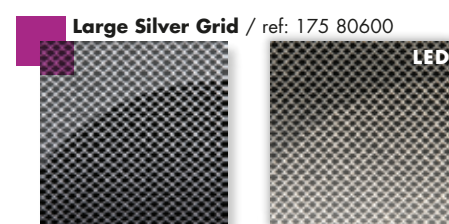

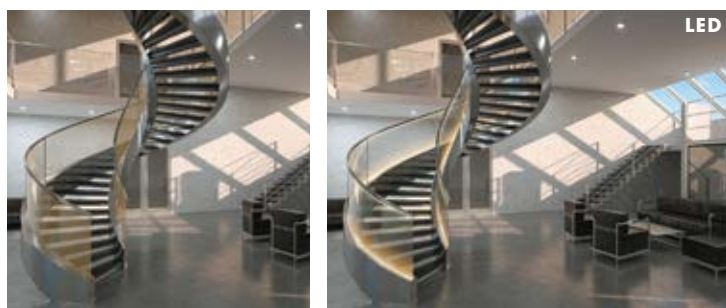

is thermoformable (within the limits of the fabric) and unbleached and can be tinted and surfaced. You can pierce it, screw it, saw it and polish it, because Altuglas® Signature can be worked like wood, minus the fibre constraints.

ALTUGLAS® SIGNATURE

is resistant to chemicals thanks to our Essential process and to UV rays via our UV Stop process. Our sheets have become a preferred partner for all types of POS creation, shop design and building construction.

ALTUGLAS® SIGNATURE

will reveal all its magic to you when you shine an LED light source on its edges. Display your creativity with wonderful effects of light playing on the weave of the fabric... Let the show begin!
